

THE PRODUCTION ROOM

LINX's Production Room is the space where we **bring your ideas to life**. Creating an exact replica of what will become your **digital solution**, we work with you to test all technological capabilities until we find the **perfect design**. That design is then carefully packed and installed in your final workspace.

Collaborate and evolve the design before it goes to your space.
Better results with 60% less time onsite.

eXpect
Flexibility

STANDARDIZATION

LINX's Production Process is the basis for platform standardization and functionality across all buildings.

SCHEDULE CHANGES

We continually work on your system in our Production Room regardless of on-site conditions allowing flexibility during schedule changes.

PROTOTYPING

We test drive your system with you before install via video call or in-person, working through any issues before we get on-site.

QUALITY ASSURANCE

QA is not done just at the end of the build; it is done throughout.

Production Room

The Off-Site Production Room Leads to

Less Time & Less Clutter On-Site

- Product tested and working before installation
- Flexible to schedule changes
- Reduced hours with shorter On-site waiting time
- Supports phased and remote projects
- More efficient with a faster closeout
- Delivers a better experience

The LINX Production Room A Differentiating INNOVATION

LINX transformed its methodology with intentional action and a 100% commitment to a better way of prototyping and production.
